DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Schon et al. (U.S. Publication No. 2003/0097131).

Schon et al. disclose an intramedullary nail (4) having a proximal end, a distal end and a central cylindrical elongated body with a chamfered end and at least one slot (32) where said device comprises an attaching means to a bone. Said intramedullary nail is cannulated (see Figure 2) comprising a round cross-section with a central elongated body. The intramedullary nail is adapted with said attaching means by way of a proximal fastener hole (48) and a distal fastener hole (16) where a fastener (50) is inserted into at least one of the fastener holes. Said fastener is configured and dimensioned for insertion in at least one of said fastener holes, further comprising a threaded hole for insertion of a screw. With regard the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Schon et al. which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that

Application/Control Number: 10/525,544 Page 3

Art Unit: 3775

the claims under attack "read on" something in the reference. Kalman v. Kimberly Clark Corp., 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Response to Arguments

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection. The amendments filed on July 31, 2009 overcome the Perry reference but do not put the case into condition for allowance.

In response to Applicant's argument that the present application has a chamfered end, as defined by a reduction in diameter by a 45 degree chamber between the cylindrical body and the right angle end, and slots for optionally securing the navicular bone and/or the medical cuneiform bone does not include certain features of Applicant's invention, the limitations on which the Applicant relies (i.e., a reduction in diameter by a 45 degree chamber between the cylindrical body and the right angle end) are not stated in the claims. Therefore, it is irrelevant whether the reference includes those features or not.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL J. ARAJ whose telephone number is (571)272-5963. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Barrett can be reached on 571-272-4746. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
